

# Transact Technical Overview

## Information Trapped in Unstructured Content

Ephesoft Transact is an intelligent document capture and data classification solution that extracts meaningful data from documents from any format in the cloud or on premise. That data feeds into your back-office applications to accelerate the pace of business transactions and processes. Our Smart Capture solutions can automatically identify the information you need without manual data entry, sorting or scanning separator sheets with barcodes.

Through patented machine learning algorithms, Ephesoft enables businesses to better classify documents by content analysis, bar code or layout. The system recognizes and captures data using OCR and ICR engines, fixed formats, free form extraction and fuzzy database logic. The Ephesoft platform is ideal for organizations with heavy document that drive your sales orders, insurance claims, mortgages, mailrooms, invoices or any other business critical process.

## Ephesoft Transact Technology

Zero foot-print, browser based application that runs on servers behind your firewall, Amazon Web Services or Microsoft Azure.

Java based, open architecture using industry standard tools to ensure customers are not locked into a proprietary stack.

Patented machine learning technology to improve over time, increasing value.

Web Services APIs and mobile capture tools.

## Easy Integration

The only document capture and extraction system to employ RESTful APIs, making ERP, CRM, document management and other back office programs document capture enabled.

## 100% Browser Based

A thin client architecture for Windows and Linux environments powers Ephesoft's fully customizable and scalable advanced capture platform, providing unlimited, uncapped document identification.

## Business Intelligence

Ephesoft's platform offers business intelligent tools to optimize efficiency, accuracy and allows users the ability to make better decisions about their data. Advanced reporting, dashboards, performance levels and analytic tools can be utilized to gain further insight and achieve higher ROI.

## Our Technology

Ephesoft's modern, open standards platform is superior to legacy server applications from IBM-Datacap, EMC Captiva and Lexmark-Kofax, providing advanced capture solutions to multiple industries, helping save time, money and human resources.

## What Our Customers are Saying

*"The Ephesoft cost structure has reduced our operating costs in ways we never thought possible. The related savings are enabling us to fundamentally change the economics of capturing information."*
